REPORT OF DIRECTOR AND SCHOOL IMPROVEMENT COUNCIL

Lexington Technology Center serves students interested in specialized career development courses from Gilbert, Lexington, Pelion, and White Knoll high schools and supports curriculum coordination for career and technology courses at each high school.

LTC offers 21 areas of specialized training. Each area has its own advisory council that works with the center's administrative advisory council, chaired by Mike Yant. More than 150 community members serve on these councils. They provide quality input to our school's strategic planning process and were critical to the successful completion of our 2007–2008 SACS accreditation report.

Recognized locally, state-wide, and nationally as a school of excellence, LTC has received the Blue Ribbon Lighthouse School Award. Students from the center have held both state and national positions in various school organizations. LTC students consistently win district, state, and national recognition for their superior skills and knowledge.

This past school year, we were selected as the state's model program for bioengineering. The state issued a \$45,000 grant to the center to establish this state-wide model program. We are developing plans to institute the first nanotechnology program in South Carolina during the 2009–2010 school year. We feel the future of our economy and the future job market for these students will include both of these cutting-edge fields of study.

This past year, all cosmetology students earned their licenses through the State Board of Cosmetology. These licenses are worth \$15,000 and represent nine months of training that students would otherwise have to complete after high school graduation. All students in Health Science Technology who completed clinical studies earned their Certified Nursing Assistant Certificates. Additional areas of successful student certifications include Pharmacy Tech, Oracle, and ASK Marketing Certification. We will continue to explore additional program areas for state and national certifications.

The major challenge for our center and school district is sufficient capacity to seat all the student requests for career major courses. Currently, we are at total student seating capacity and are not meeting student course requests due to lack of classroom space and teacher loads. We are floating teachers to completely utilize our current instructional space at the center and still do not have adequate computer labs to satisfy student interest.
